

VALENCIA FOOTBALL STADIUM VALENCIA, SPAIN VALENCIA CITY AUTHORITY

The proposal for a new 60,000 seat stadium for Valencia Football Club celebrates the much loved sense of theatre of their historic home and the immediacy of the fans to the pitch. The 180m diameter arena is designed to host a variety of events, with an optimised configuration for football.

The new stadium has a unique character that wraps around and embraces the event, helping to control noise and light pollution, with an external envelope that can tune its permeability to suit the occasion, ranging from closed and private to open and embracing, with a range of vibrant water side cafes, restaurants, bars with retail accommodation arranged around the perimeter offering a welcome respite from the heat of the day.

Advanced conference, presentation and meeting facilities welcome visitors throughout the year, complementing existing facilities in the region, with immediate access to a wide range of public transport including the new underground station.

Client: Valencia City Authority
Area: 60,000 seats
Project Status: Completed feasibility
Team: Arup Sport
Date: 2003
